

FAST COOKING OVENS QUICK START GUIDE

STEP (MANUAL) MODE		
1	Your oven is factory preset to STEP MODE . Plug the oven into correct outlet and touch the dark LCD screen. After 3 seconds the PREHEAT? screen will appear. Press YES if proceeding to cooking, or NO to go to SETTINGS .	
2	If you chose YES , the PREHEATING screen will appear. (Preheat temps are factory preset to 450F on 120V units and 425F on 220V units. To modify, at Step 1 above, go to SETTINGS> Adjust Temps> Modify> Adjust Preheat.)	
3	When preheating is done, press SET COOK TIME on the next screen.	
4	The COOK TIME OPTIONS SCREEN 1 will appear. If your desired time appears, press it. (If you need longer cook time, press NEXT and the COOK TIME OPTIONS SCREEN 2 will appear. Press desired time.) CONVECTION HEAT (hot air circulated by rear fan) will run for this time.	
5	When you press the desired cook time in Step 4, the RADIANT HEAT DURATION screen appears. Choose % of total cook time that you want to add RADIANT/ INFRARED (top) HEAT to the CONVECTION HEAT .	
6	On next screen, press START . Cooking will begin and time will count down. (Pressing STOP will stop the cooking, and screen will revert to beginning of choosing STEP MODE COOK TIME .)	
7	When cook time is done, flashing DONE screen will appear and beeper will sound continuously. 	
8	When user opens the oven door, DOOR OPEN screen will appear.
